MANOJ GALI

SAP Integration Suite Consultant | SAP CPI | SAP BTP | API Management | B2B/EDI | S/4HANA

Atlanta, GA | +1 (972) 460-1721 | manoj.gali695@gmail.com | LinkedIn | Portfolio | GitHub

SUMMARY

SAP Integration Suite Consultant with 5+ years of experience designing and delivering cloud and hybrid integrations across SAP S/4HANA, SAP BTP, Salesforce, and enterprise platforms. Strong hands-on expertise in SAP Cloud Integration (CPI), Groovy, XSLT, REST, OData, IDoc, API Management, B2B/EDI, Trading Partner Management, and event-driven integration. Experienced across integration architecture, interface development, data transformation, API security, testing, CI/CD, deployment, monitoring, production support, and go-live. Proven ability to build scalable, secure, and resilient integration solutions supporting high-volume enterprise business processes and complex SAP landscapes.

PROFESSIONAL EXPERIENCE

CONA Services LLC (Coca-Cola North American Bottling Ecosystem)

SAP Integration Suite Consultant | Jun 2025 – Present | Atlanta, GA, USA

- Architected and delivered 25+ end-to-end SAP Integration Suite / Cloud Integration (CPI) interfaces for Order-to-Cash (O2C) between Salesforce Consumer Goods Cloud and SAP S/4HANA, applying reusable integration patterns and API-led connectivity across hybrid landscapes.
- Built and maintained CPI iFlows across quote-to-order, sales order, order acknowledgement, inventory, pricing, delivery, billing, and order-status scenarios, supporting 50K+ messages per day on standard, upgrade-safe integration content.
- Integrated Salesforce REST APIs with SAP S/4HANA using REST/HTTPS, IDoc, and OData, transforming JSON payloads into SAP-compatible business structures with validation, routing, and exception handling.
- Designed and governed APIs through SAP API Management using OAuth 2.0, certificates/mTLS, throttling, security policies, and analytics across 20+ enterprise interfaces, applying API lifecycle and governance standards.
- Onboarded 15+ trading partners via B2B/EDI (ANSI X12/EDIFACT, AS2, SFTP) using Trading Partner Management and Integration Advisor, reducing partner onboarding time by 30%.
- Engineered graphical, XSLT, and Groovy mappings to validate, enrich, route, and transform partner-specific payloads, supporting consistent data exchange across SAP and external systems.
- Implemented asynchronous, event-driven integration patterns using SAP Advanced Event Mesh and JMS, decoupling producers and consumers to support scalable event processing, sustaining 25K+ events per day.
- Configured secure connectivity between SAP Integration Suite and enterprise systems using SAP Cloud Connector, OAuth 2.0, X.509 certificates, TLS/mTLS, and SFTP, with centralized credential and certificate management.
- Improved integration reliability through exception handling, retry/recovery, idempotency, duplicate prevention, correlation IDs, and SAP Cloud ALM monitoring, reducing unplanned outages by 40% and error-resolution time by 35%.
- Led SIT, UAT, regression, negative, EDI-partner, and performance testing, resolving 50+ defects and validating end-to-end business scenarios before production release.
- Managed Dev/QA/Production deployments through Cloud Transport Management and CI/CD, supporting cutover, go-live, production monitoring, defect resolution, and hypercare.

Schneider Electric

SAP Integration Consultant | Sep 2019 – Jun 2023 | India

- Delivered SAP S/4HANA Cloud logistics integration for transport-demand automation across order-to-delivery, applying SAP SD/LE and Transportation Management (TM) integration patterns.
- Built SAP Integration Suite / CPI scenarios using standard integration patterns and SAP APIs to exchange logistics and transportation data between S/4HANA Cloud and external systems.
- Integrated sales orders, outbound deliveries, and transportation demands (Freight Units), automating conversion of logistics documents into planning-ready transportation requirements.
- Owned SAP TM processes covering Freight Unit creation, Freight Order planning, transportation execution, carrier coordination, and freight settlement across the Order-to-Transport lifecycle.
- Configured transportation relevance, control keys, freight-unit building rules, shipping conditions, and logistics settings to automate transportation-demand creation.
- Monitored and troubleshot integrations, including failed messages, API/interface errors, mapping issues, master-data inconsistencies, and document-processing exceptions, cutting incident resolution time by 30%.
- Executed 30+ end-to-end test scenarios (SIT, UAT, regression) across order creation, delivery processing, Freight Unit generation, Freight Order planning, execution updates, and freight settlement.
- Supported cutover, deployment, go-live, and hypercare, covering interface validation, master-data verification, connectivity checks, production monitoring, and post-go-live issue resolution.

TECHNICAL SKILLS

- **SAP Integration & BTP:** SAP Integration Suite, SAP Cloud Integration (CPI), SAP BTP, SAP PI/PO, SAP S/4HANA, SAP S/4HANA Cloud, SAP ECC, SAP API Management, SAP Cloud Connector, SAP Open Connectors, Edge Integration Cell, BTP Connectivity Services, SAP Business Accelerator Hub
- **Integration Architecture:** API-led Connectivity, Hybrid Integration, A2A Integration, B2B Integration, Integration Patterns, Cloud-to-Cloud Integration, Cloud-to-On-Premise Integration
- **Integration Development:** Groovy, XSLT, Java Mapping, Graphical Mapping, Value Mapping, User-Defined Functions (UDF), Content Modifier, Exception Subprocesses, REST, SOAP, OData, IDoc, RFC, BAPI, Proxy, JSON, XML, Data Transformation, Data Validation, Data Enrichment
- **API & Security:** API Management, API Lifecycle Management, API Governance, OAuth 2.0, SAML, X.509, TLS/mTLS, PGP Encryption/Decryption, SAP Secure Store, API Policies, Throttling, Rate Limiting, SFTP, FTP
- **B2B / EDI:** ANSI X12, EDIFACT, AS2, Trading Partner Management, Integration Advisor, B2B/EDI Integration, Partner Onboarding
- **Event-Driven Integration:** SAP Advanced Event Mesh (AEM), JMS, Kafka, Topics & Queues, Publish/Subscribe, Asynchronous Messaging, Event-Driven Architecture
- **Migration & Modernization:** SAP PI/PO to Integration Suite Migration, PI/PO-to-CPI Migration, Integration Assessment, Migration Assessment, Clean Core, Integration Modernization
- **DevOps & Operations:** Git, CI/CD, SAP Cloud Transport Management (CTMS), SAP Cloud ALM, Monitoring, Message Processing Logs, Performance Tuning, Observability, Troubleshooting, Root Cause Analysis, Retry/Recovery, Idempotency, Correlation IDs, Cutover, Go-Live, Hypercare
- **Tools & Collaboration:** Postman, Agile/Scrum, JIRA, Confluence, ServiceNow
- **SAP AI & Emerging Integration:** SAP Joule, AI-Assisted Integration Development, MCP for Agentic AI, SAP Developer Hub, SAP Graph

EDUCATION

- Master of Science – Computer Science
  Trine University | Jul 2023 – May 2025
